About company

"Sheremetyevo-cargo" is one of the largest air cargo terminals in Russia. The company works for more than 30 years.

"Sheremetyevo-Cargo" is the most high-tech ground handler in the Moscow aviation hub.

28 000 m²

Main terminal area

71 m²

Valuable goods
warehouse

200 000 t

Annual turnover

970 persons

Staff members

"Sheremetyevo-Cargo" has a wide experience of handling valuable goods.

- Handling of valuable cargoes is done under separate technology independently of the main cargo flow. Warehouse of valuable goods is an isolated room with safe storage. In addition to its own protection system the warehouse is equipped with police alarm system.
- The warehouse is equipped with the most modern equipment and control systems, as well as gas fire suppression system.
- For 28 years there has been no cases of loss of valuable cargo by the fault of "Sheremetyevo-Cargo"

Handling guidelines

Our goal is to provide handling service in the shortest time, ensuring high quality service and 100% cargo safety

Planning works on the basis of preliminary information received from the airline and clients

Monitoring the location of the transport, delivering cargo via GPS

Monitoring of cargo at all stages of handling, including video control

Work with the cargo is carried out only by reliable staff, unauthorized persons have no access to cargo

Transportation of valuable goods across the ramp

Transportation and loading of export cargo

- ✓ Valuable cargo is delivered to the aircraft in a truck, equipped with a dashboard camera, under the protection of the aviation security staff
- ✓ Aircraft loading is performed under control of the airline and security staff
- ✓ Cargo handling control is carried out till the actual departure of the aircraft

Unloading and transportation of import cargo

- ✓ All information about arriving valuable goods comes to operations control department from the airline
- ✓ The aircraft unloading, calculating the number of pieces, inspection of packaging and sealing, delivery of cargo to the warehouse is performed under the control of security staff
- ✓ In case of violations or discrepancies we make photo and video of the damages of the package, notify the police

Organization of work at the valuable cargo warehouse

Access to the warehouse is provided on the basis of biometric data of employees (fingerprints and iris images) and electronic personal passes

The start and ending time of all operations with the goods and documents are registered in system

Weighing of cargo is made on the highly accurate scales, the weight is photographed and automatically transmitted to the information system

All operations with the goods, including inspection and customs control, carried out directly at valuable warehouse

Warehouse work is controlled by own aviation security service of “Sheremetyevo-Cargo”

Technological stages of handling are registered in the system using the barcoded labels

Surveillance

Stationary camera

Digital video surveillance system of the company includes more than 600 cameras. Surveillance video records from the valuable warehouse are kept at least 30 days.

Personal video recorder

This device allows to monitor the handling process online and record video in HD quality.

Video recorder on the equipment

We also use video recorders mounted on equipment. For example, this camera records the process of loading (unloading) of cargo to /from the BULK compartment of the aircraft.

Video cameras at the warehouse

Security control center

Additional operations with valuable goods

Photographing of cargo pieces

Storage of highly valuable goods (VUN)

Separate zones. Sealed storage containers.

Sealing truck with cargo at the exit gate

Preliminary examination of cargo

Our advantages

Delivery of cargo to Sheremetyevo on flights of more than 30 airlines from around the world

Attention to the customer's needs and details of service, readiness to comply with additional customer requirements

Step-by-step management of all operations

Certified and trained staff with average work experience of 12 years

Flexible rates policy, the cost of services depends on the volume of cargo

The terminal is located closely to the aircraft parking places
